ABSTRACT

This report presents the first comprehensive profile of the nearly six-thousand students who entered the University of British Columbia (Canada) as British Columbia (BC) college transfer students between 1992/93 and 1996/97. Section A presents a profile of BC college transfer students by: year of admission, transfer credits, first-year workload, full-time/part-time status, faculty of intended major, degree goal, program of study, age, gender, college, region, and lower mainland public colleges. Section B looks at quality/academic performance of BC college transfer students by: admission percentages; academic performance at admission, and percentages after first, second, and last session; grades in selected courses; and degree completion rate. Section C examines the profile of BC college transfer students who have graduated by: session average for last year; grade point average at admission, and after first, second, and last session; graduation degree specialization; credential awarded; credential awarded and average number of years to complete; and session average for last year. The study is modeled on a similar study first completed by Simon Fraser University in October 1996. Hence report designs and definitions are, as much as possible, intended for comparison with the Simon Fraser study. (VWC)

Summary

UBC admits between 1,000 and 1,500 students transferring from B.C. colleges annually. As a fraction of the total number of students admitted, B.C. college transfers comprise 20% to 25% of all registered admissions. The majority of these students come to UBC from the lower mainland, and this proportion is increasing.

College transfers from outside the lower mainland exhibit a slight tendency to enter UBC with a greater number of college credits than do those from within the lower mainland. Cariboo University College students tend to enter with the most transfer credits; Camosun College students show the largest percentage of students transferring with fewer than 30 credits.

The number of first year credit hours taken by college transfer students differs substantially from that of high school admissions. College transfer students are far more likely to be part-time students. Transfer students from outside the lower mainland tend to take higher course loads than those from the lower mainland.

A majority of transfer students enter one of three faculties: Arts, Science, or Applied Science. These three faculties take in 80% of all college transfer students. Compared with high school admissions, college transfer students are more likely to enter the Faculty of Arts, and less likely to enter the Faculties of Science and Applied Science. Students entering Applied Science, Pharmaceutical Sciences and Law have higher admission averages.

Students at UBC may choose from over one hundred different programs, but college transfer enrolment is highest in Commerce, Biology, Psychology, Human Kinetics, and Computer Science. Compared with high school admissions, college transfer students have a higher probability of enrolling in Human Kinetics.

College transfer students tend to be much older than high school admissions. While the vast majority of entering high school students are under the age of 20, the largest cohort for college transfer students is aged 20-24, with significant numbers of students aged over 25. The average college transfer is four to five years older than the average high school admission.

Overall, the percentage of female college transfers (54%) is similar to that for high school admissions (56%). Two institutions stand out as very different in terms of gender

distribution: over 70% of the students transferring from Emily Carr Institute of Art and Design and the Open University are female.

Transfer students from all colleges experience a decrease in measured academic performance in their first year at UBC relative to their entry grade. On average the drop is 4 percentage points. By the end of students' second yeat at UBC, the drop in percentage is partially recovered, with an average increase from the prior year of 2 percentage points. There is no further significant trend upwards or downwards in the performance observed for most college transfers after their second year at UBC.

Of those students admitted on the basis of College Transfer in 1992/93 and 1993/94, 76% completed a degree within five years of entering UBC. The percentage of students who graduate tends to increase with the number of transfer credits: students with fewer than 30 credits have a graduation rate of 58%; those with more than 55 credits have a graduation rate of 87%. The average grades for college transfer and high school admissions upon degree completion are 75% and 77% respectively.

Of the 5,840 students admitted to UBC on the basis of transfer from a B.C. college over the period from 1992/93 to 1996/97, 2,327 (or 40%) obtained a UBC degree. The number will continue to increase for some time, as many of these students are still in progress toward a degree. On average, college transfer students took 2.4 Winter sessions to complete a degree; again, this number will increase when students still in progress eventually complete. Most students who finish a degree do so on a full-time basis.

Definitions

College Transfer Student: a student admitted to a UBC faculty on the basis of a minimum of 30 credits obtained at one or more colleges in transferable courses. Students must have a minimum grade point average of 2.00, but individual faculties may, as a consequence of enrolment quotas, set a higher admission standard.

B.C. High School Admission: A student admitted to a UBC faculty on the basis of high school completion. Such a student may also have credit from a college towards a degree, but the grades on which the admission are taken are from the high school records.

Session: Grade and year level data for this report is based on enrolment in the UBC Winter session only, which begins in September and ends in April of the following year. The session is divided into two terms, but some courses may span both terms. The term "year" is also used interchangeably with "session."

Grading Systems: UBC grades are expressed as a percentage. College students are admitted on the basis of a four point scale.

Transfer Credit: Credit toward a degree program at UBC based on courses successfully completed at a college.

Full-time and Part-time: A full-time student is defined as a student enrolling in 24 or more credits in the Winter Session. A student enrolling in less than 24 credits is defined as part-time. The typical UBC program (e.g. B.A. Arts) would require a student to register in 30 credits for each of four Winter sessions, although some programs require more than 30 credits per session.

Degree completion: a student is defined as having completed a degree in either May or November of the year if the student has applied to graduate and has successfully completed the degree requirements. The date at which a student is recorded as having completed the degree may not be the date at which the student has completed all course requirements. Indeed, for a variety of reasons, many students continue to enroll in courses without obtaining a degree for some time.

Other institutions: "other institutions" comprise the Open University and instances where the college is unknown.

Unclassified students: students who are registered at UBC, but have not been admitted to a degree program in a particular faculty.

Degrees and programs of study: A degree program consists of a degree, as well as a program within that degree. For example, students may choose the Bachelor of Arts degree, and the Economics program within that faculty. Degrees shown in Table 17 are abbreviated as follows:

BA	Bachelor of Arts
BASC	Bachelor of Applied Science
BCOM	Bachelor of Commerce
BEDE	Bachelor of Education (elementary)
BEDS	Bachelor of Education (secondary)
BFA	Bachelor of Fine Arts
BHE	Bachelor of Home Economics
BHK	Bachelor of Human Kinetics
BLA	Bachelor of Landscape Architecture
BMLS	Bachelor of Medical Laboratory Science
BMUS	Bachelor of Music
BSC	Bachelor of Science
BSCA	Bachelor of Science, Agriculture
BSCD	Bachelor of Science, Dietetics
BSCF	Bachelor of Science, Forestry
BSCN	Bachelor of Science, Natural Resource Conservation
BSCP	Bachelor of Science, Pharmacy
BSF	Bachelor of Science, Forestry
BSN	Bachelor of Nursing
BSOT	Bachelor of Science, Occupational Therapy
BSPT	Bachelor of Science, Physiotherapy
BSW	Bachelor of Social Work
DEDU	Diploma in Education
DFTN	Diploma in French Translation
LLB	Bachelor of Law

Introduction

This report represents the first ever comprehensive profile of the nearly six thousand students who entered UBC as college transfer students between 1992/93 and 1996/97. The study is modeled on a similar study first completed by Simon Fraser University in October 1996. Hence report designs and definitions are, as much as possible, intended for comparison with the Simon Fraser study.

The data for this study comprises 5,840 students who were admitted to faculties at UBC on the basis of admission "College Transfer". The cohort is not uniform in that various faculties have applied grade cut-offs to limit enrolment to quotas over the period, and some students have been admitted under this category despite having less that 30 credits.

The study does not include all students who enter UBC with transfer credit from a college. Many students are admitted on the basis of their high school performance, but nevertheless have attended a B.C. college and have accumulated some transfer credit toward a degree.

The student's B.C. college of transfer is deemed to be the institution from which the most credits were transferred. The seventeen colleges and one technical institute represented in this report are organized by college regions within British Columbia.

Note also that the total number of college transfer students (and, for comparison, high school admissions) varies among tables. This is due mainly to data for pertinent variables being missing from the source, and to the size of the examined cohort varying (eg. a smaller number graduate than are admitted).

Analysis

A: PROFILE OF B.C. COLLEGE TRANSFER STUDENTS

UBC admits between 1,000 and 1,500 students transferring from B.C. colleges annually. As a fraction of the total number of students admitted, B.C. college transfers comprise 20% to 25% of all registered admissions. In 1996/97 a relatively high fraction, 24% of all new students, were B.C. college transfers. The number and fraction vary primarily as a result of the overall intake quotas in the faculties.

Table 1: Distribution of B.C. College Transfers Admitted to UBC by Year of Admission

A majority of college transfer students come to UBC from lower mainland colleges (78.5% in 1996/97), and this fraction has been steadily increasing - from 65.9% in 1992/93. The fraction of college transfers from outside the lower mainland has decreased from 32.5% in 1992/93 to 18.3% in 1996/97.

By far the largest numbers of college transfer students to UBC transfer from Langara/VCC (26.6 % over the five year period in this report), and this fraction has remained relatively stable on an annual basis. Approximately half of all college transfers to UBC are from three lower mainland colleges: Langara/VCC, Kwantlen, and Capilano. The three Northern B.C. colleges provided, on average, 3.4% of the total transfer students, although the annual percentage shows a declining trend. In 1996/97, 2.0% were from Northern B.C. colleges. From outside the lower mainland, the largest number of transfers came from Okanagan University College (7% of the total).

Table 2: Distribution of Student Transfer Credits at Time of Admission to UBC (for college transfers admitted in 1995/96 and 1996/97)

Prior to 1995/96, students were awarded transfer credit toward the degree program in which they registered, hence not all transferable courses were included in the total transfer credit. As of Winter 1995, all transfer credits are listed on the student record, irrespective of their inclusion within credits toward a particular degree. In order to more accurately describe the distribution of transfer credits, Table 2 includes only transfer students from 1995/96 and 1996/97.

The distribution of transfer credits is somewhat bi-modal, showing a tendency for students to complete either one full year (approximately 30 credits) or two full years

(approximately 60 credits) of college courses. Students from outside the lower mainland exhibit a slight tendency to enter UBC with a greater number of college credits than those from within the lower mainland.

Of the colleges with more than 10 transfers, University College of the Cariboo students tend to enter with the most transfer credits: 52% entered with more than 50 credits. Camosun College students comprise the largest percentage of students transferring with fewer than 30 credits (32%).

Table 3a: Distribution of Workload (in credits) of Transferring Students in their first year of transfer at UBC

Although full-time is defined as 24 or more credits, 30 credits is more typical of a required full-time load (the actual requirement varies among departments). While 72% of high school admissions enroll in 28 or more credits in their first year, only 46% of college transfer students do so. Transfer students from outside the lower mainland tend to take higher course loads than those from the lower mainland; 60% of non-lower mainland students take over 28 credits, versus 42% of lower mainland students.

Table 3b: Full-Time/Part-Time Status of Transferring Students at UBC

Considering the strict definition of 24 or more credits, the difference becomes more dramatic. Only 76% of college transfer students are full-time, whereas 95% of high school admissions are full-time. College transfers from outside the lower mainland show a higher percentage (84%) of full-time students than do those from the lower mainland (74%).

Table 4: Distribution of B.C. College Transfers Admitted to UBC by Faculty (for college transfers admitted from 1992/93 to 1996/97)

For both college transfers and high school admissions, a majority of students enter one of three faculties: Arts, Science, and Applied Science (Engineering). These three faculties take in 80% of all college transfer students; high school admissions comprise 91% of all admissions. College transfer students are more likely than high school students to enter the Faculty of Arts (52% versus 45%), but less likely than high school students to enter the Faculties of Science and Applied Science (both faculties combined: 28% versus 47%).

College transfers from the lower mainland are much less likely to enter the Faculty of Science (17%) than are transfers from outside the lower mainland (31%). Malaspina, Okanagan, and Northwest show relatively high percentages transferring into Science. Several colleges (North Island, Cariboo, and Northwest) also show higher than average fractions of students entering the Faculty of Forestry. Camosun is notable for its relatively high proportion of transfers into Applied Science.

Table 5: Distribution of B.C. College Transfers Admitted to UBC by Degree Goal (for B.C. College transfers admitted from 1992/93 to 1996/97)

The distribution of degree goals shown in Table 5 is a reflection of the faculty in which students register, as shown in Table 4. The higher admission averages for students entering Applied Science, Pharmacy, and Law are the result of admission quotas, i.e., students are admitted on the basis of admission average.

Table 6: Distribution of B.C. College Transfers by Approved Program of Study (for B.C. college transfers admitted to UBC from 1992/93 to 1996/97)

Students at UBC may choose from over one hundred different programs; Table 6 has been limited to the 15 programs where college transfers are highest. Students in other programs are listed under "Other Programs" along with those who have not yet selected a major specialization. Human Kinetics, Commerce, Biology, Psychology, and Computer Science are the programs where college transfer enrolment is highest. Comparable statistics for high school admissions are not shown because students normally declare a major subject after two years of study. However, the pattern of programs selected by college transfers is very similar to the overall pattern, with the exception of Human Kinetics, where the enrolment of college transfer students is higher, mainly as a result of enrolments from specific colleges (Fraser Valley, Douglas, and Malaspina).

Table 7: Age Distribution of B.C. College Transfers Admitted to UBC from 1992/93 to 1996/97

College transfer students tend to be much older than high school admissions. While the vast majority of high school admissions are under the age of 20 at the time of entry, the largest cohort for college transfer students is aged 20-24, with significant numbers of students aged over 25. The average college transfer is four to five years older than the average high school admission.

There is also a significant difference between college transfer students from the lower mainland and those from outside the lower mainland. Students from the lower mainland tend to be somewhat older, with only 11.4% in the under 20 cohort, versus 19.9% under 20 from outside the lower mainland. Particularly high age distributions are seen for Douglas and Langara Colleges.

Table 8: Gender Distribution of B.C. College Transfers Admitted to UBC from 1992/93 to 1996/97

Overall, the percentage of female college transfers (53.8%), is similar to that for high school admissions (55.8%). Two institutions stand out as very different in terms of gender distribution: over 70% of students transferring from Emily Carr and the Open University are female, but it should be noted that these two institutions do have a large proportion of female students (70% at Open University and 60% at Emily Carr).

B: QUALITY/ACADEMIC PERFORMANCE OF B.C. COLLEGE TRANSFER STUDENTS

Table 9: Distribution of Admission Percentages for B.C. College Transfers

The admission percentages shown in Table 9 are derived by conversion from the 4 point scale used by most colleges, to the equivalent percentage stored on UBC records. The minimum average required for admission to UBC, 2.00, is converted to a value of 60%. The percentages are those associated with the most recent institution attended, hence for students who attended more than one previous institution, the percentage shown may not have been the only criterion for admission. Two percent of students show percentages below the minimum required.

The median of 72.1% would correspond to a grade point average of 2.70. Ninety-three percent of all college transfers are admitted with a percentage of 75 or less, equivalent to a grade point of 3.20.

Table 10: Academic Performance of B.C. College Transfers Admitted to UBC

Table 10 shows the academic performance of BC college transfers in terms of percentages at four distinct points in the students' academic progression: at admission; at the end of first year at UBC; at the end of second year at UBC; and at the end of the last year at UBC.

Transfer students from all colleges experience a decrease in measured academic performance in their first year at UBC relative to their entry grade. On average, the drop is 4.5 percentage points (excluding those colleges with very small numbers entering UBC), with the largest drop of 8.6 percentage points attributed to Selkirk College students, and the smallest drop of 1.62 percentage points attributed to Fraser Valley students. There is a slight tendency for this drop in percentage to be greater for college transfers from outside the lower mainland (-4.5 versus -5.8 points). By the end of students' second year at UBC, the drop in percentage is partially recovered, with an average increase from the prior year of 2.2 percentage points. There is no further significant trend upwards or downwards in the performance observed for most college transfers after their second year at UBC.

Table 11: Comparison of Course Grades in Selected Courses

The admission average of high school admissions is by no means comparable to the admission average of college transfer students; little can be said by comparing the high school average to the transfer average since these are not on comparable scales. Once both groups of students are at University, however, their subsequent performance can be compared. High school students, perhaps unsurprisingly given their admission averages, outperform college transfer students by 4 to 5 percentage points (on average by course).

Table 12: Degree Completion Rate of B.C. College Transfers (for college transfers admitted in 1992/93 and 1993/94)

Of those students admitted on the basis of College Transfer in 1992/93 and 1993/94, 76% completed a degree within four or five years of entering UBC. While comparable figures for B.C. high school admissions have not been computed, it is still interesting to note that historically the graduation rate for those starting out at UBC in year one is approximately 65%. For these students most of the attrition takes place after first year.

The percentage of students who graduate within four or five years of entering UBC tends to increase with the number of transfer credits; students with fewer than 30 credits have a graduation rate of 58%, those with more than 55 credits have a graduation rate of 87%.

C. PROFILE OF B.C. COLLEGE TRANSFER STUDENTS WHO GRADUATED

Table 13: Distribution of Average for Last Year at UBC

Ideally, for comparison with similar reports from other universities, Table 13 would show the graduation average. Since no graduation average is computed on the UBC data files, Table 13 shows the distribution of the average attained by students in their last session at UBC. The advantage of this measure over the graduation average is that it is untainted by the first term grade, which as was shown in Table 10, characteristically decreases in the first term for college transfer students.

The average grades for college transfer students and high school admissions upon degree completion are 75% and 77% respectively; 36% of high school admissions have a session average of 80% or more, compared with 30% of college transfers.

Comparing the last session grades in Table 13 with the grades at the end of first and second year in Table 10 shows a significant increase in average grades as college transfer students progress toward graduation.

Table 14: Academic Performance of B.C. College Transfers who have Graduated from UBC from 1992/93 to 1996/97, by GPA on Admission, and after 1st, 2nd, and Last Year

Like Table 10, Table 14 shows a similar increase in grades as students progress. The highest grades are obtained by transfers from Fraser Valley, Okanagan, and North Island; the lowest grades are obtained by those from the two private colleges and from Northern Lights.

Table 15: B.C. College Transfers by Graduation Degree Specialization (For B.C. College Transfers Admitted to UBC from 1992/93 to 1996/97)

The distribution of graduates by degree specialization shows a large fraction of college transfer graduates with a specialization in Human Kinetics. This is a direct result of the large numbers of transfers from that program, especially from Douglas College.

College transfers tend to be more concentrated among the larger departments in the Faculty of Arts (Psychology, English, History, Geography) than are high school admissions.

Table 16: B.C. College Transfers by Credential Awarded

Of the 5,840 students admitted to UBC on the basis of transfer from a B.C. college over the period from 1992/93 to 1996/97, 2,327 (or 40%) obtained a UBC degree. (The number will continue to increase for some time, as many of these students are still in progress towards a degree.) The majority of these (1,654) are from the lower mainland, but a substantial number (632) transferred from colleges outside the lower mainland.

Table 17: B.C. College Transfers by Credential Awarded and Average Number of Winter Sessions to Complete Credential (for B.C. College Transfers admitted to UBC from 1992/93 to 1996/97)

The Winter Session at UBC comprises the academic year from September through to the following April. The measure "average number of winter sessions" is roughly equivalent to the number of years taken to complete the degree (though some students do attend in summer). On average, transfer students took 2.4 Winter sessions to complete the degree. As a consequence of the brief time frame of this study, only full-time transfer students have (thus far) completed their degrees. The average time to completion, as well as the total degrees completed, would increase should we follow these cohorts for several more years.

Profile of B.C. College Transfer Students Who have Graduated

Table 13
Distribution of Average for Last Year at UBC
B.C. College Transfers vs B.C. High School Admissions
(For Students Admitted to UBC From 1992/93 to 1996/97)

Last Year Average	College Transfers		High School Admissions	
	Frequency	Percent	Frequency	Percent
< 30	57	2.45%	2	0.16%
30-34	2	0.09%		0.00%
35-39	5	0.21%		0.00%
40-44	3	0.13%	1	0.08%
45-49	5	0.21%	2	0.16%
50-54	12	0.52%	1	0.08%
55-59	37	1.59%	10	0.79%
60-64	109	4.68%	46	3.62%
65-69	265	11.39%	130	10.24%
70-74	495	21.27%	241	18.99%
75-79	643	27.63%	374	29.47%
80-84	481	20.67%	318	25.06%
85-89	189	8.12%	120	9.46%
90-94	22	0.95%	24	1.89%
> 95	2	0.09%		0.00%
Total Graduates	2327	100.00%	1269	100.00%
Last Year Average	75%		77%	

Note: College transfers show higher numbers of graduates because they arrive at UBC with transfer credits toward a degree.
Note: Last Year Average are only those grades received during their final year's worth of credits, not a cumulative grade of their entire career.
Note: Only 1269 of those admitted from high school had completed 4 years of university study in the 5 calendar years under review (the remainder are still working towards the degree or had left the university).
